

Vadilal Chemicals Limited

Vision Statement

To emerge as a leading Asian Supplier of Gases and Gas equipments with dedicated focus on Quality, Affordability, Innovation and Customer Satisfaction

Vadilal Group

The story began with one man's foresight and a small outlet, serving handmade ice creams. When Shri Vadilal Gandhi opened Vadilal Soda Fountain in 1940, he believed in one credo

"TO PROVIDE A QUALITY PRODUCT AT AN AFFORDABLE PRICE."

Holding this simple value, the tiny outlet grew into one of the most loved names in the ice cream industry "Vadilal".

Over a period of time, what began as an ice cream unit, diversified into food processing, financial services, securities, real estate, construction and industrial chemicals and gases, making Vadilal a multi-crore group.

Quality, innovation and customer satisfaction are the guiding principles that mark Vadilal's ventures, creating for the group the reputation of a provider of high quality products and services.

Vadilal Chemicals Ltd.

Vadilal Chemicals Limited is a leading player in the industrial gas business that supplies pure gases, industrial gases mixtures and specialty gases. We carry a high degree of commitment towards quality, safety and services to ensure full customer satisfaction.

Commitment to Quality

Our commitment to quality is best highlighted by the ISO-9001:2000 certification for our manufacturing unit at Por, Baroda. Highly sophisticated analytical instruments, coupled with advanced filling systems and adoption of the latest technologies ensure the supply of high-quality gases and gas mixtures. A strong ethic of safety and responsibility pervades our work atmosphere. This, along with our innovative spirit has made us one of the leading players in India. Guaranteed accuracy and traceability have helped us build a reputation as a supplier of gases of international standards.

Vast Supply Network

With a network of 12 depots spanning the length and breadth of India, we have spread our reach across the country. Catering to a wide range of industries, we have more than 3000 customers to our credit, easily making us one of the leading players in the industry. With several bottling plants and over 55 tankers, we ensure prompt delivery of high-quality gases to our customers. We supply Nitrogen, Helium, Argon, Zero Air, Hydrogen and other gases in more than 30,000 high-pressure cylinders. In addition, 10,000 low-pressure cylinders are at work for the supply of ammonia and other low pressure gases.

Focus on Customer Satisfaction

At Vadilal Chemicals, our commitment to satisfying customer requirements has led to our high growth rate and the extension of our reach across India. In the process, we have evolved into a highly competitive entity with great expertise in the field of industrial gases and chemicals. This has enabled us to provide solutions that enhance customers' industrial performance while retaining a concern for protecting the environment.

Our customer-driven products, along with our reliable, value-added services & trained manpower have enabled us to make great strides in attaining customer satisfaction for supply of industrial gases and chemicals.

Product range

Vadilal Chemicals Ltd. (VCL) is a leading player in India, supplying a spectrum of high-quality industrial gases and chemicals, meeting the requirements of a wide range of industries. Its commitment to quality and safety ensures the supply of high-grade gases that enhance customers' industrial performance.

VCL's single-minded focus on providing value-addition to customers' business has driven it to achieve expertise in the field of industrial gases.

VCL today has developed an extensive era of customer driven products like Industrial gas, Speciality gas and Gas Mixtures.

Industrial Gases

High Purity Gases

Ammonia
Argon
Carbon Dioxide
Helium
Hydrogen
Nitrogen
Oxygen
Zero Air

Liquified Gases

Liquor Ammonia
Liquid Argon
Liquid Carbon dioxide
Liquid Nitrogen
Liquid Oxygen

Speciality Gases

Hydrocarbon Gases

1-Butene
 1-2 Butadiene
 1-3 Butadiene
 Cis-2-Butene
 Decane
 Di-Ethyl-Ether
 Di-Methyl-Ether
 Ethane
 Ethyl Acetylene
 Ethylene
 Heptane
 Hexane
 iso-Butane
 iso-Butylene
 Methane
 Methyl Acetylene
 n-Butane
 Nonane
 Octane
 Pentane
 Propadiene
 Propane
 Propylene
 Trans-2-Butene
 Vinyl Acetylene

Rare Gases

Krypton
 Neon
 Xenon

Toxic Gases

Carbon Monoxide
 Carbonyl Sulphide
 Hydrogen Chloride
 Hydrogen Sulphide
 Nitric Oxide
 Nitrogen Dioxide
 Sulphur Dioxide

Speciality Gases

Argon Research Grade
 Helium Research Grade
 Hydrogen Research Grade
 Nitrogen Research Grade
 Oxygen Research Grade
 Sulphur Hexafluoride

** Other speciality gases can be supplied on specific request*

Gas Mixtures

VCL have a rich experience in supplying high quality industrial gas mixtures. Our products adhere to highly accurate specifications through very stringent quality assurance process, statistical quality control and production control measures. At VCL we offer highly accurate, stable gas mixtures that are free of critical contaminants, ensuring high performance and reliability.

Some standard gas mixtures made and supplied for applications in Lighting, Automobiles, Pharmaceuticals, Precision Welding applications and Laboratories include: Ar+ H₂, Ar+ N₂, Ar+CO₂, Ar+He, Ar+CO₂+O₂, N₂+H₂, N₂+O₂.

**Other gas mixtures can be tailor-made as per customers requirement.*

Calibration Gas

VCL has acquired the production of multi-component calibration gas mixtures. We can engineer them to match a wide range of processes according to customers requirement. Tailor-made calibration gas mixtures with concentration ranging from ppm to percentage levels are produced in our production unit which is equipped with state-of-the-art filling systems and sophisticated analytical equipment used for handling all kinds of mixtures. We can also supply liquid gas mixtures based on customers requirements.

Calibration Gases & Auxiliary Gases for Analytical purposes

- Process Analysis
- Explosimeter Control
- Environmental & Emission measurements
- Auto emission measurements
- Drunk - Driving tests
- Auxiliary gases for gas chromatography
- Auxiliary gases for spectrometry

Gas Mixtures for use in Industrial Processes

- Laser Applications
- Lighting industry
- Fruit ripening
- Odourisation - Hydrosafe

Gases for Medical Use

- Blood gas analysis
- Lung infusion measurements
- Oxygen uptake

Industries we cater to

VCL caters to the requirement of over 3000 satisfied customers in India, including some of the largest Industrial houses. Our customer list includes users from major sectors such as:

- Government organizations
- Academic institutions
- Automobiles
- Petrochemicals and refineries
- Cement plants
- Pharmaceutical
- Fertilizers
- Metallurgical industries
- OEM
- Chemicals
- R&D centers

With over 30 years experience in the field, our clients trust us as a reliable supplier of high quality industrial gases and chemicals.

Gas Handling Equipments

We provide specially designed gas handling equipments which are used in various gas applications. Being the manufacturer of the equipment, we have total control over equipment quality. The equipment is designed to ensure that the speciality gases reach the customer's point-of-use at the required purity and pressure. Decades of experience in the safe practices of handling cylinders helps us in this process. In addition, all the gas-handling equipments are comprehensively tested for safety as well as quality.

Regulators

Our stainless steel & brass regulators provide the highest quality available in terms of construction, flexibility and integrity. They are proven products in applications requiring high delivery pressure and gas purity.

Manifolds

We can supply manifolds to meet the exact client requirements. The manifolds assure delivery of contamination-free gases and come with easy leak-tight integrity.

Point-of-Use Panels

Point-of-use Panels provide convenient regulation and control of specialty gases. They ensure a high degree of control in delivery of gas and protect the instruments.

Valves & Fittings

We supply check valves of high quality, designed to permit gas flow in one direction only and ensure reliability in usage at the regulator outlet. Tube fittings are designed to provide quick, leak-proof connections. They ensure excellent seal performance. Fittings can be shipped completely assembled and ready for immediate use.

Other Services

We provide specialized technical services that adhere to high quality standards and take care that the projects are completed within the stipulated time-frame. Our Cryogenic Division is involved in the sale of cryogenic spares, rental and sale of cryogenic equipment, supply of cryogenic gases in tankers and sale of ultra-high purified and specialty gases. The division also provides specialized services like gas purging, pipeline and Tank/ Vessel Purging, fabrication work (Gas Distribution System & Manifold system)

Our technical services cater to the needs of a wide range of industries, involving large scale operations in sectors like Petrochemicals, Oil & Gas, Pharmaceuticals, Electronics, Automobiles, Cement, Construction, Power plant, Shipping and Engineering.

Regulators

Point of use panels

Purge Assemblies

Valves & Fittings

We have been regularly undertaking purging jobs for LPG, LNG and other gas pipelines in the western region. In addition, we have worked extensively with leading players like Larsen & Toubro, GAIL, Punj Lloyd, Toyo, B J Services, Gammon and many more. Purging and commissioning jobs were undertaken for IOCL, Indo-Gulf Fertilizers, GNFC, GSFC, NCPL, Shell, among others.

A dedicated team of engineers, supervisors and skilled workers undertake these works with the support of a network of plant and branches and fleets of cryogenic tankers for transporting liquid nitrogen. VCL's ability to mobilize equipment and manpower within a short time has made it the most sought after company for undertaking such jobs / operations involving tight deadlines and precision workmanship.
